

## Rebuilt Equipment

Rebuild before Rebuild after

Benefits:

Rebuilding can extend equipment life, reduce down-time and minimize maintenance expense

Rebuilding typically costs half of new equipment cost

In some cases upgrades are available to increase the productivity of the machine

Features:

Frames are stripped, baked and sand-blasted to remove old paint, grease and oil - then repainted

Parts are inspected and worn parts are replaced or reconditioned

All seals and bearings are replaced.

Lubricants are changed

Covers are repaired or replaced as required

Finished machine is tested to verify compliance with the original factory specifications

Fastener Engineers Lewis Machine rebuilds straighten & cut machines, wire drawers and payoffs. In addition to rebuilding, we can repair or refurbish machines as an even lower cost alternative.
